EPICHEM SECURES QUALITY ACCREDITATION TO ISO 17034 REFERENCE MATERIALS PRODUCTION

WE ARE PROUD to announce that our reference materials have been accredited to **ISO 17034:2016** *General requirements for the competence of reference material producers*.

Customers can be confident that organic reference materials and laboratory services offered by Epicchem meet the highest internationally accepted standards. Our catalogue of pharmaceutical API, degradant and impurity standard materials can be found [here](#). An example of our very extensive and detailed *Product Information Sheet* can be found [here](#) and details of the scope of our accreditation are [here](#).

Audited and accredited by the National Association of Testing Authorities (NATA), our accreditation incorporates elements of **ISO 17025** and, along with our existing **ISO 9001** certification, is recognition that Epicchem's products and services meet global standards established by the International Organisation for Standardisation (ISO).

Epicchem is one of the first companies in Australia to achieve this internationally regarded standard in support of pharmaceutical drug manufacturing and we look forward to working with our existing and potential partners world-wide to meet their reference material and associated chemistry needs.

ABOUT ISO

The International Organisation for Standardisation (ISO) is a globally recognised independent body providing world-class specifications for products, services and systems, to ensure quality, safety and efficacy.

ABOUT NATA

The National Association of Testing Authorities, Australia (NATA) is Australia's national accreditation body. As NATA is a signatory to Mutual Recognition Arrangements, reports from NATA accredited facilities are recognised overseas, thus providing opportunities for organisations supporting trade of Australian goods and services.
