Expertise & Facilities

Our People

- Highly skilled team of synthetic and medicinal chemists, the majority of whom are qualified to PhD level.
- International industry experience.
- Experienced project managers.
- Dedicated chemistry team ensuring project management continuity and corporate memory.

Our Technology

- Purpose built facilities with leading-edge technology for organic synthesis on a mg to 1 kg scale.
- Extensive range of equipment for synthetic chemistry, including; microwave, high pressure, and photochemistry reactors, and parallel chemistry systems ranging from 3 mL to 150 mL.
- Wide range of purification instruments including; preparatory HPLC and automated flash chromatography.
- Full analytical support including; HPLC, LC-MS, GC-MS, NMR, Karl Fischer and melting point apparatus.

Medicinal Chemistry & Drug Discovery

- Hit Generation
- Hit Validation
- Lead Generation
- Lead Optimisation
- Project Management
- Small & Large Scale Synthesis
- Design & Synthesis of Analogue Libraries
- Benchmark Compounds
- Drug Impurities & Metabolites
- Synthetic Route Optimisation & Development
- Full Compound Characterisation
- Problem Solving
- Flexible collaborative or fee-for-service models
- FTE contracts or fixed pricing available for smaller projects

Working with You, for You

- Epichem focuses on excellence, efficiency and the commercial realities of the drug discovery industry.
- Servicing an international clientele; ranging from academic groups and small drug discovery companies to multinational pharmaceutical companies, we offer a flexible, cost-competitive approach to addressing individual client requirements.
- With the expertise to value add at any stage of early phase discovery, Epichem brings uniquely innovative problem solving to the table, and is committed to saving clients' time and money whilst building and securing their intellectual property.
- We are able to work independently, or collaboratively with existing project teams, and take care to facilitate seamless technology transfers, whilst providing a clear point of contact for our clients. Each project is managed by an experienced medicinal chemist committed to the client's discovery program.
- Our sound reputation is built upon our extensive scientific expertise, our ability to understand clients' needs and employ strategic thinking to address them, and our capacity to innovate.
- Experienced in global, collaborative, multidisciplinary drug discovery projects, Epichem has a proven process in place for the management and shipping of data and compounds.

Outsource in Confidence, with Confidence

- Robust Quality System
- Professional
- Flexible
- Cost Effective
- Customer Focused
- Responsive

Why You Can Trust Us

- Australia's premier contract drug discovery company.
- Over 10 years of experience in the global drug discovery sector.
- Registered Research Agency with the Australian Government.
- Numerous compounds have progressed to clinical trials.
- Operate under Australia's robust legal system guaranteeing the protection of your IP.
- Audited by multinational pharmaceutical companies.
- Exported products and services to over 30 countries worldwide.
- Recipient of the 2011 DNDi Partnership of the Year Award.
- Winner of an Australian Export Award 2010.
- Western Australian Export Award Hall of Fame.
